Education

Indian Institute of Technology Roorkee 2024 – 2028
Bachelor of Technology *CPI: 7.7*

Technical Skills

LLMs, Agentic Systems, RAG, System Design, Data Structures & Algorithms, DBMS, MERN, CI/CD, Docker, Ethereum VM, DeFi, ZK Proofs and Circuits, C++, Python, Rust, Golang

Experiences

Paddox Technologies | *Founding Engineer* August 2026 – Present

- Developing a platform that lets companies hire, train, and manage multiple AI employees.
- Building core agent infrastructure for persistent identity and memory, adding multiple app integrations and autonomous work across company tools.

Cloutly | *Co-Founder* May 2026 - July 2026

- Building an intelligence layer for content creators that accelerates content creation workflows, connects creators with influencer marketing deals and manages campaigns for consumer brands end-to-end.
- Validated the product by interviewing 50+ creators and industry stakeholders in one week and onboarding multiple users pre-launch.

IIM Ahmedabad Ventures | *Summer Resident Apprenticeship* May 2026 - July 2026

- Founded and built **Cloutly**, an AI startup for content creators, leading MVP development, user research, talking to customers and VCs and early go-to-market validation.
- Worked closely with VCs, experts and startup founders to refine product strategy, validate market demand and prepare for launch.

WeLaunch.AI | *AI Engineer, Intern* March 2026 - April 2026

- Designed and deployed a multi-agent Slack automation system for a sales team, reducing manual workflow time by 80% and streamlining sales operations.
- Orchestrated agent-driven lead handling, follow-ups, and internal task coordination directly within Slack, enabling the team to manage routine sales workflows from a single interface.

BlocSoc IITR | *Developer* October 2024 - Present

- Developed Web3, agentic and benchmarking projects which have raised more than 2 ETH in grants and mentored 40+ students in Rust, ZK and agentic system development.

Key Projects

Orbital | *Rust(Stylus), DeFi, AMM* | Github

- Built **Orbital**, A multi-dimensional concentrated liquidity AMM for thousands of stablecoins in a single LP. An implementation of | Paradigm's whitepaper, all written in Stylus(Rust-based framework of Arbitrum).

Grothy-crab | *Rust, ZK-SNARKs, Groth16* | GitHub

- Implemented Groth16 zkSNARK in Rust from scratch, following the algorithm end-to-end: from R1CS constraints, QAP construction and trusted setup through to proof generation and verification.

Deimos | *Rust, Flutter, Circom, Noir, Risc0* | Github

- An open-source benchmarking platfrm for computing zero-knowledge proofs in frameworks like Groth16, Rapidsnark, Risc0, Imp1, Cario-m, Plonk etc. on mobile devices. Project under BlocSoc IITR.

Open Source: Actively contributing to projects like **Intelowl**, **Deimos**, **ICU4X** and **kyverno** across Rust, Golang and Python.

Achievements, Positions & Responsibilities

- One of 100 students across all IITs, NITs and IIMs selected for the **OPJEMS Scholarship**.
- **1st place** at Arbitrum Hacker House, Bangalore, **2nd place** at Arbitrum Open House (implemented Orbital) and won **45000 USD cash prize**.
- **3rd place** in Syntax Error'24, IITR, **1st place** Shaastra'21 IITM, **1st place** in CrackHack'25, IIT Mandi, **2nd place** at IIT Dhanbad BFX'21, **3rd place** in Monad Blitz Lucknow.
- **All India Rank 6173** in JEE Advanced, **99.72 percentile** in JEE Mains) **100** in Mathematics and Physics.
- Cleared **Pre-Regional Mathematics Olympiad (PRMO)** in 2021.
